

## Preparing for your trip

### What you mustn't forget for your trip in Canada

#### Type of luggage

If you are doing a one-way trip, collecting and returning your motorhome in different cities, it is best to use **soft, flexible bags or backpacks**. These types of bags can be folded and more easily stored away in the motorhome once you have unpacked. **Hard suitcases will waste space** in the vehicle. If you are doing a round trip, collecting and returning your motorhome in the same city, you can **leave your empty bags in a storage area** at the local rental agency where you collect your motorhome.

It is also a good idea to keep a **small day bag** available so that you can carry valuables with you when you leave the motorhome to site see.

- **National and international drivers licences**
