

Sweden

Discover Sweden by motorhome

With its **scenic roads** and **vast wilderness** populated by huge coniferous forests, Sweden invites you to a journey unlike any other. Nothing better than renting a motorhome to explore this country that stretches to the North Pole! CampingCar-Online has been specializing in **motorhome** rentals abroad since 2001.

Sweden: conquering green spaces

Sweden is an excellent winter destination, but in summer it is at its most beautiful. You can relax in a **traditional sauna** or go **deep-sea fishing**. Outside the big cities such as Stockholm and Malmö, nature is everywhere. The roads here are in excellent condition and the highways are free. You will only have to be careful with wild animals.

Sweden in a motorhome: a child's play!

Close to nature, the Swedes allow campers to park in the forest, provided that they are more than 300 meters away from the houses and that they respect the place. **Wild camping** is very popular! You will find public sites all over the country, as well as many developed campsites. This is a great opportunity to blend in with **nature**. And since hotel and restaurant costs are high in Sweden, renting a motorhome will allow you to travel freely without restrictions.
